

Fjord Analytics — Q3 2025 Operations Report

1. Executive Summary

Fjord Analytics closed Q3 2025 with two platform migrations and a reorganisation of the support function. As a company focused on supply-chain forecasting, the leadership team tracked regional performance, headcount, pricing, service levels and vendor spend against the annual plan, all of which are detailed in the sections that follow.

The Checkout platform is owned by the Core Services team; its on-call lead for the quarter is Ibrahim Sow, who also chairs the weekly reliability review.

Management notes that comparisons to the prior year are affected by the change in revenue recognition adopted at the start of the fiscal year.
