

Fjord Analytics — Q4 2025 Operations Report

1. Executive Summary

Fjord Analytics closed Q4 2025 with heavy investment in reliability after an incident-heavy prior quarter. As a company focused on supply-chain forecasting, the leadership team tracked regional performance, headcount, pricing, service levels and vendor spend against the annual plan, all of which are detailed in the sections that follow.

The Search platform is owned by the Payments team; its on-call lead for the quarter is Sena Yıldız, who also chairs the weekly reliability review.

Where a metric definition changed during the quarter, the prior quarter has been restated on the new basis.

2. Regional Performance

Regional results are reported in constant currency. Revenue reflects recognised subscription and services revenue; growth is quarter-over-quarter; churn is logo churn measured at renewal; NPS is the trailing 90-day relationship score.
